DETAILED ACTION

Reason for Allowance

1. The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 4 are allowable over prior art of record.

Claims 2, 3, 5, and 6 depend from claims 1 and 4, therefore, are allowable.

Independent claims 1 and 4 recite the limitation of:

"...calculate a color correction quantity to match tone and brightness of the non-degenerated region in the specimen with the counterparts of the non-degenerated region in the standard specimen, and correcting the image data of the specimen with the color correction quantity".

The closest reference of US 4,741,043 to Bacus discloses a method and apparatus for image analyses of biological specimens, where extracting cell objects on the basis of gray level information. However, this reference either by itself or by combination with other references does not teach the calculating of color correction quantity to match tone and brightness of the non-degenerated region in the specimen with the counterparts of the non-degenerated region in the standard specimen, and correcting the image data of the specimen with the color correction quantity.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

3. The non-patent literature to Ichiro HANKAWA, Kensa to Gijutsu, ISSN:0301-2611, Vol. 29, No. 7, pp. 842-844, (June i2001) cited in the IDS of September 15, 2006 and duplicated in IDS of December 26, 2006 has not been considered. The document is in Japanese without an accompanying English translation on file.
